✓ 1. Mr. Lavenia, of the staff of the Senate Permanent Subcommittee on Investigations, called to state that Frank Carr, Chief of the Committee Staff, had mentioned to Senator McCarthy the fact that they were planning to include a footnote in the Committee report on the Government Printing Office to the effect that CIA did not have any printing done at the main GPO plant, and Senator McCarthy had requested that such a footnote at least be held up if not cancelled. Lavenia did not tell Carr that he had previously told ~~me~~ of their proposed action, and I assured Lavenia that he could forget the fact that he told ~~me~~ as no one here would be aware of it. This left Lavenia much relieved.
